Wireless Tire Pressure Monitoring Systems

TirePressureMonitor.com and Tire Pressure Monitoring Systems

Since 1992 – About L&S Safety Solutions, Tire Pressure Monitoring Systems and TirePressureMonitor.com

The relationship between TirePressueMonitor.com and Tire Pressure Monitoring Systems was born over 20 years ago when the staff at L&S Safety Solutions was inspired to work on an invention that would produce a tire deflation alert system; now they're referred to as tire pressure monitor systems or TPMS. In 1992, L&S Safety Solutions researched and started developing this idea and later joined teams with another company attempting to come up with a similar device called TireMate; L&S eventually joined them as their exclusive North American Distributor with a website titled TirePressureMonitor.com.

CURRENT SPECIALS -

Call us about our upcoming Holiday specials! Buy peace of mind for your loved ones, buy a PressurePro tire pressure monitoring system today!

(Specials do not apply to the “Intelligent” models.)

With each WEB SITE Monitor order plus a minimum of 4 Sensors, you get:

- FREE! Sensor Lock Kit (small wrench and 10 lock nuts)
- FREE! Dashtop Monitor Mounting Bracket
- FREE! Shipping is free too! (Click for details)
- Call 800-521-6820 or 928-660-8744

And check out our Trade-in Program for new, updated Sensors! Unlike other systems whose batteries only last 1 to 1 1/2 years, PressurePro batteries last 4-7 years. Then trade in your old Sensors for brand new ones, with updated technology and new batteries for a discounted price.

PROUDLY MADE IN THE USA!

Mission Statement

In business for over 20 years, L&S Safety Solutions is the leading tire pressure monitoring system distributor in the USA. L&S is committed to providing a reliable, durable, accurate, simple to install and easy to use TPMS product (PressurePro) that is trusted by customers, ensuring greater safety and savings for its users. Contributing to society and the environment is another prime focus by decreasing greenhouse gas emissions and Carbon Monoxide pollutants caused by improperly inflated tires.

L&S safety Solutions is made up of talented individuals who believe in our mission and have a strong commitment to our customers. Pressure Pro is also committed to a strong development program providing strategic and quality products at competitive pricing, increasing value for customers.
